

The biggest Nordic safety and risk management trade fair to be held in Finland

In the autumn, 11-13 September 2018, the number one safety industry event will bring thousands of current and future professionals and volunteer workers to the Tampere Exhibition and Sports Centre for networking and training.

The combination of events includes the EuroSafety, Safety and Workplace Welfare trade fairs as well as the two-day Logistics event and the Occupational Health Convention, now held in Tampere for the second time. The program will offer numerous activities to see and experience, interesting speakers as well as new products and services.

Occupational safety is also important for internal logistics – the Logistics Trade Fair held at the same time

Internal logistics and material handling professionals will meet at the Logistics Trade Fair held at the Tampere Exhibition and Sports Centre on 12 and 13 September 2018. The industry's most significant event in Finland showcases internal logistics and material handling as well as logistics and warehousing services.

"In addition to the Logistics Trade Fair, the Safety, EuroSafety and Workplace Welfare events will also offer a great deal of interesting content for internal logistics professionals who are often responsible for occupational safety and well-being within their organisations. They will have a chance to meet hundreds of other professionals showcasing a range of safety products from personal protective equipment to first aid supplies," says Project Manager Veli-Pekka Rouvali of Tampere Trade Fairs.
