**Cascade Europe exhibits at Logistiikka 2018  
Booth 301 in Hall C – [www.cascorp.com](http://www.cascorp.com)**

VERONA, Italy – (12th September, 2018) – Cascade Europe, the global leader in lift truck attachments, forks, accessories will exhibit at Logistiikka in Tampere, Finland on the 12<sup>th</sup>-13<sup>th</sup> September 2018.

Cascade is pleased to display the **new 3H Paper Roll Clamp**, a compact clamp with an innovative, unique design that is fast, lightweight and versatile. It is ideally suited for paper and packaging converters where rolls are handled from pallet to unwinding machine without touching the ground.

Cascade shows the innovative **52G Recycling Bale Clamp** that can quickly dump or invert a load easily and accurately. It's designed with full width alloy steel wear bars, it endures harsh recycling environments. A cylinder bumper protects the hydraulic lines and cylinders of the attachment from impact and debris. Moreover, a full width lip over UHMW bearings provide maximum strength, reducing wear for longer service life.

Attendees can also discover Cascade's extensive line of **Damage Reduction Solutions** to deliver that perfect paper roll every time. Damage reduction solutions on display will include the **DTI (Digital Tilt Control)** that informs the driver if the mast is tilted properly for level clamp pads, **AFC (Adaptive Force Control)**, which prevents driver from over clamping the load, and **EPR (Electronic Pressure Regulator)**, a basic method for controlling the pressure applied on paper roll. Cascade will also reveal the newest addition to these options, the innovative and versatile **HFC+™ (Hydraulic Force Control)**. This accessory uniquely enables a single paper roll clamp to handle two distinct size ranges of paper rolls while reducing the risk of damage.

At this tradeshow will be introduce **the Damage Reduction System for Carton Clamp HFC-CC**, a useful mechanism to hoist pressure. It controls clamp force calculating load weight and it reduces product damage from excessive clamp force.

To learn more about Cascade's wide-range of innovative products, visit **Booth 301 in Hall C**.

Cascade's highly skilled sales team will be at our booth 301 in Hall C, to recommend a **customizable material handling solution**, including **rental** and **remanufactured** alternatives.

###

**About Cascade Corporation**

*Established in Portland, Ore. in 1943, Cascade Corporation is the global leader in the design, manufacturing and marketing of lift truck attachments, forks and related technologies and a leader in quality attachments for the construction industry. Cascade's unmatched service, support and expertise, combined with advanced damage reduction technologies, flexible manufacturing, short lead times and high-quality products, strengthen the company's position as the premier supplier to the material handling industry.
